

Date	Project
7.13-7.19	Finished the clone of DHFR-FRB/FKBP fusion protein with His Tag in pET28a Finished the clone of Lactamase-FRB/FKBP fusion protein with His Tag in pET28a
7.20-7.26	Adjusted the direction of the flanking gRNA recognition sequence in the 27bp-spacer plasmid with Wei Weijia.
7.27-8.2	Made plan for the Human Practice and dated with the interviewer.
8.3-8.9	Conducted the ethics discussion with Doctor Xie from Biomedical Ethics Committee of Peking University
8.10-8.16	Interviewed the associate chief physician Li BO of Beijing research institute for TB control Interviewed the Director WANG Suming from Beijing research institute for TB control
8.17-8.23	Engaged in the Conference of China iGEMer Committee(CCIC). Constructed the high-throughput plasmids containing gRNA targets from E.coli genome with Liu Dongming and Wei Weijia.
8.24-8.30	Constructed the high-throughput plasmids containing gRNA targets from B.subtilis genome with Liu Dongming and Wei Weijia. Visited to the central laboratory of Beijing research institute for TB control with Zhang Xiaohan, Ye Yixuan and Liu Dongming.
8.31-9.6	Finished the construction of the high-throughput plasmids containing gRNA targets from B.subtilis genome.
9.7-9.13	Wrote Human practice parts in wiki
9.14-9.20	Wiki Uploading
